

Module 6

1) What are events in Google analytics?

Ans) Events in Google Analytics are used to track specific actions that users do on a website or mobile app. These actions help website owners understand how visitors interact with their website.

Below is the explanation in very simple and detailed words.

What Are Events in Google Analytics?

Events are actions that a user performs on a website that we want to track.

In simple words:

👉 An event means any activity or action done by a visitor on the website.

These actions are usually small interactions that do not load a new page, but they are still important to track.

For example:

- **Clicking a button**
- **Watching a video**
- **Downloading a file**
- **Submitting a form**
- **Clicking a link**

All these actions are called events.

Example to Understand Events

Imagine a user visits your website and does these things:

- 1. Clicks the "Download PDF" button**
- 2. Plays a video**
- 3. Clicks a contact button**
- 4. Submits a newsletter form**

These actions are events because the user interacted with something on the website.

Google Analytics records these actions so we can understand what users are doing on our website.

Why Events Are Important

Events are important because they help us understand user behaviour.

Events help us know:

- What users click on**
- Which buttons users use the most**
- Which videos users watch**
- Which files users download**
- Which forms users submit**

This information helps businesses improve their website and increase conversions.

Examples of Events

Here are some common examples of events:

1. **Button Click**
 - Example: "Buy Now" button click
2. **Video Play**
 - Example: User plays a product video
3. **File Download**
 - Example: User downloads an eBook or PDF
4. **Form Submission**
 - Example: User fills a contact form
5. **Link Click**
 - Example: User clicks a social media link

All these interactions are tracked as events in Google Analytics.

Types of Events in Google Analytics

In Google Analytics 4, events are divided into different types.

1. Automatically Collected Events

These events are tracked automatically by Google Analytics.

Examples:

- `page_view`
- `session_start`
- `first_visit`

These events do not need manual setup.

2. Enhanced Measurement Events

These events track interactions automatically when enabled.

Examples:

- **Scroll tracking**
- **Outbound link clicks**
- **Video engagement**
- **Site search**

These help track user engagement easily.

3. Recommended Events

These events are suggested by Google for better tracking.

Examples:

- **purchase**
- **login**
- **sign_up**
- **add_to_cart**

These are useful for e-commerce websites.

4. Custom Events

These events are created by the website owner.

Examples:

- **"Download Course PDF"**
- **"Click WhatsApp Button"**
- **"Click Book Appointment"**

These events are created to track specific actions on the website.

Example of an Event Structure

An event usually contains some information:

- **Event Name → Name of the action**
- **Event Parameters → Extra details about the action**

Example:

Event Name:

video_play

Parameter:

video_title = "Digital Marketing Course"

This helps track which video the user watched.

Benefits of Using Events

Events provide many benefits:

- 1. Helps understand user behaviour**

2. Shows which content users interact with
3. Helps measure marketing performance
4. Helps improve website design
5. Helps increase conversions and sales

Simple Definition

Events in Google Analytics are **actions performed by users on a website or app, such as clicking a button, watching a video, or downloading a file.** These events help track how users interact with the website.

Q2. Connect Website/Blog to Search Console, Analytics & Tag Manager — Add Faculty as User

Ans) Step 1 : Google Search Console

Users (3)			
Name ↑	Email	Permission	
Riya Kaushalbai Trivedi (you)	riyakaushalbhairtrivedi@gmail.com	Owner Verified ?	⋮
rtrivedi0540	rtrivedi0540@gmail.com	Owner Verified ?	⋮
sanket.tops	sanket.tops@gmail.com	Restricted	⋮
Rows per page: 10 ▾ 1-3 of 3			< >

Step 2 : Google Analytics

Personal Development and Lifestyle › trainingforfitness			Search	
Property access management 2 rows				+ ⋮
☐	Name ↑	Email	Roles and data restrictions ⓘ	
☐	 Riya Kaushalbai Trivedi	riyakaushalbhairtrivedi@gmail.com	Administrator	⋮
☐	 sanket.tops@gmail.com	sanket.tops@gmail.com	Viewer	⋮

Step 3 : Google Tag Manager

Fitness Growth > riyaz0novdm.blogspot.com

Container permissions2 rows

Search

	Name ↑	Email	Permissions ⓘ	User status ⓘ	
	Riya Kaushalbhai Trivedi	riyakaushalbhaitrivedi@gmail.com	Publish	Has access	
	sanket.tops@gmail.com	sanket.tops@gmail.com	Read	Invitation pending	

Q3. Submit Sitemap and robots.txt in Search Console

Ans) To Submit Sitemap

Submitted sitemaps							
Sitemap	Type	Submitted ↓	Last read	Status	Discovered pages	Discovered videos	
/sitemap-pages.xml	Sitemap	Feb 14, 2026	Mar 11, 2026	Success	3	0	⋮
/sitemap.xml	Sitemap	Feb 14, 2026	Feb 14, 2026	Success	14	0	⋮
Rows per page: 10							1-2 of 2 < >

Robots.txt

Custom robots.txt

User-agent: * Disallow: /search Disallow: /category/ Disallow: /tag/ Allow: /
Sitemap: https://mindgrowlblog.blogspot.com/sitemap.xml Sitemap:
https://mindgrowlblog.blogspot.com/sitemap-pages.xml

Q4. Submit User Flow and Traffic Source Reports

Ans) User Flow Report

https://drive.google.com/file/d/1H3JlQrI8_e71rHu0g5ObDmzcwzly72fO/view?usp=sharing

Traffic Source Report

<https://drive.google.com/file/d/1c7FyXgEmb wzrvRiKNtf4GQTgG GpybuNr/view?usp=sharing>

5. Connect Blog to Google Analytics — Study Traffic Types

Ans) connecting blog to google analytics

Stream details 			
STREAM NAME	STREAM URL	STREAM ID	MEASUREMENT ID
mindgrowlblog	https://mindgrowlblog.blogspot	14389521756	G-P640WC5Q65 

Types of Traffic in Google Analytics :

<u>Traffic Type</u>	<u>Source</u>	<u>How to view</u>
Organic Search	Google, Bing, Yahoo	Traffic Acquisition
Direct	Browser URL, Bookmark	Traffic Acquisition
Referral	Other websites, Blogs	Traffic Acquisition
Social	Facebook, Instagram, Twitter, LinkedIn	Traffic Acquisition
Email	Gmail, Outlook, Newsletter	Traffic Acquisition
Paid Search	Google Ads, Bing Ads	Traffic Acquisition

Other	Unknown sources, Misc traffic	Traffic Acquisition
-------	----------------------------------	---------------------

Q6. Create a Goal and Study Whether It Has Been Completed

Ans) In GA4, Goals are called Conversions. They measure whether users complete a desired action.

How to Create a Goal/Conversion in GA4:

Events can be used for Google Analytics reporting and advertising purposes. New events can be marked as key events. Events used for conversions will be automatically marked as key events. [Learn more about event creation](#)

Provide an event name that indicates what it is being measured

Riya

Mark as key event
Key events are the events that are important to your business, such as a purchase or a newsletter signup. They will be displayed in the events and key events report. ▼ ☐

Choose how to create an event

☒ Create without code
Create an event that can be detected by your Google tag without adding any code to your website.

Summary of your new event:

Data stream
mindgrowlblog

Event name
riya

Event criteria
event_name equals page_view page_location contains (ignore case) page_view

Edit event configuration

☐ Create with code
Provide the name and install code on your website or app to identify the event you want to measure.

Checking Goal Completion Reports :

<https://drive.google.com/file/d/1c7FyXgEmbzwrvRiKNtf4GQTgGGpybuNr/view?usp=sharing>

Q7. Track Interactions in Google Tag Manager for www.esellerhub.com

Ans)

← Add a New Account

Account Setup

Account Name
ESELLERHUB

Country
India

☐ Share data anonymously with Google and others

Container Setup

Container name

www.esellerhub.com

Target platform

Web
For use on desktop and mobile web pages

iOS
For use in iOS apps

Android
For use in Android apps

AMP
For use in Accelerated Mobile Pages

Server
For server-side instrumentation and measurement

Create

Cancel

Triggers
