

Section A

1) What is PPC? Explain with an example.

Ans) PPC (Pay-Per-Click) is a type of **online advertising** where a business pays money only when someone clicks on their advertisement.

In very simple words, PPC means you pay for each click on your ad. If people see your ad but do not click it, you do not pay.

Businesses use PPC to promote their products, services, or websites and bring more visitors to their website. One of the most common platforms used for PPC advertising is Google Ads.

How PPC Works

1. A business creates an advertisement on an advertising platform like Google Ads.
2. The business chooses keywords related to their product or service.
3. When people search those keywords on Google Search, the advertisement appears at the top or bottom of the search results.
4. If someone clicks on the ad, the business pays a small amount of money for that click.

This helps businesses bring targeted visitors to their website.

Example of PPC

Suppose you have a website called Fitness Growth.

You create a PPC advertisement on Google Ads using the keyword “fitness tips for beginners.”

When people search this keyword on Google Search, your advertisement may appear on the search results page.

- **If 100 people see the advertisement, you do not pay anything.**
- **If 10 people click the advertisement, you pay for those 10 clicks only.**

This means you only pay when someone actually visits your website through the ad.

Benefits of PPC

Some important benefits of PPC are:

- **It brings instant traffic to a website.**
 - **It helps businesses reach the right audience.**
 - **It is cost-effective, because you only pay when someone clicks.**
 - **It helps increase sales and brand awareness.**
-

Simple Definition

PPC is an online advertising method where businesses pay only when users click on their ads to visit their website.

2) Difference between PPC and SEO

Ans) Difference Between PPC and SEO

Both PPC and SEO are used to bring visitors to a website from search engines like Google Search. However, they work in different ways.

What is PPC?

PPC (Pay-Per-Click) is a type of paid online advertising where a business pays money every time someone clicks on their advertisement.

Businesses create ads using platforms like Google Ads. These ads appear at the top of search results when people search for related keywords.

Example of PPC

If a website promotes fitness tips, it can create an ad for the keyword “fitness tips for beginners.”

When someone searches that keyword, the ad appears.

If the person clicks the ad, the business pays for that click.

What is SEO?

SEO (Search Engine Optimization) is the process of improving a website so it appears higher in search results naturally without paying for ads.

SEO includes improving content, keywords, website speed, and backlinks to help the website rank better in search engines like Google Search.

Example of SEO

If a website writes a blog post about fitness tips, and it is well optimized with good content and keywords, it may appear in the organic search results when people search for that topic.

In SEO, businesses do not pay for clicks.

Key Differences Between PPC and SEO

PPC	SEO
PPC is paid advertising	SEO is free (organic traffic)
You pay every time someone clicks the ad	You do not pay for clicks
Results are immediate	Results take time to appear
Ads appear at the top of search results	SEO results appear below ads in organic results
Traffic stops if you stop paying	Traffic can continue even without paying

Simple Summary

- PPC → Paid method to get quick traffic.
- SEO → Free method that takes time but gives long-term results.

Both PPC and SEO are important for digital marketing because they help businesses increase website traffic and reach more customers.

3) What is Quality Score? Factors affecting it.

Ans) Quality Score is a rating given to your advertisement by Google Ads.

It tells how good and useful your ad is for people who search on Google Search.

The Quality Score usually ranges from 1 to 10.

- **1–3 → Low Quality**
- **4–6 → Average Quality**
- **7–10 → High Quality**

In very simple words, Quality Score shows how relevant and useful your ad, keyword, and landing page are to users.

If your Quality Score is high, your ad can:

- **Appear higher in search results**
 - **Cost less money per click**
-

Example

Suppose you run ads for a website called Fitness Growth.

You create an ad for the keyword “home workout tips.”

If your ad:

- **matches the keyword**
- **gives useful information**
- **sends people to a good webpage**

Then Google Ads will give your ad a high Quality Score.

Factors Affecting Quality Score

There are three main factors that affect Quality Score.

1. Expected Click-Through Rate (CTR)

This shows how likely people are to click on your advertisement.

If many people click your ad after seeing it, the CTR becomes high.

Example:

If 100 people see your ad and 10 people click it, your CTR is good.

Higher CTR → Better Quality Score

2. Ad Relevance

Ad relevance means how closely your ad matches the keyword that people search for.

Example:

Keyword: “fitness tips for beginners”

Good Ad:

“Simple Fitness Tips for Beginners – Start Your Healthy Life Today”

Bad Ad:

“Buy Mobile Phones Online”

The first ad is relevant, so it will get a better Quality Score.

3. Landing Page Experience

A landing page is the webpage where users go after clicking the advertisement.

Google Ads checks if the landing page:

- Loads quickly
- Has useful information
- Is mobile friendly
- Matches the ad content

Example:

If someone clicks an ad about fitness tips, the page should show fitness tips, not something unrelated.

Good landing page → Higher Quality Score

Why Quality Score is Important

Quality Score is important because it:

- Helps ads rank higher in search results
 - Reduces advertising cost
 - Improves ad performance
 - Gives better user experience
-

✓ Simple Definition:

Quality Score is a rating in Google Ads that measures how relevant and useful your ads, keywords, and landing pages are for users.

4) What is CTR? Write the formula.

Ans) What is CTR?

CTR (Click-Through Rate) is a measurement used in digital marketing to understand how many people click on an advertisement or link after seeing it.

In very simple words, CTR tells us how many people are interested in an ad or link and decide to click on it.

CTR is an important metric used in online advertising platforms like Google Ads and search engines like Google Search. It helps marketers understand whether their ads are attractive and relevant to users.

When people see an ad, they may or may not click on it. CTR helps measure the percentage of people who actually click the ad.

If the CTR is high, it means the advertisement is interesting and relevant to users.

If the CTR is low, it means the advertisement may need improvement.

CTR Formula

The formula used to calculate CTR is:

$$\text{CTR} = (\text{Number of Clicks} \div \text{Number of Impressions}) \times 100$$

Meaning of the Formula

- **Clicks** → The number of times people click on the advertisement or link.
- **Impressions** → The number of times the advertisement is shown to people.

After dividing clicks by impressions, the result is multiplied by 100 to convert it into a percentage.

Example

Suppose a business runs an advertisement for its website.

- **The advertisement is shown to 500 people.**
- **Out of those 500 people, 50 people click the advertisement.**

Now we calculate CTR:

$$\text{CTR} = (50 \div 500) \times 100$$

$$\text{CTR} = 10\%$$

This means 10% of the people who saw the advertisement clicked on it.

Why CTR is Important

CTR is important in digital marketing because it helps businesses:

- **Understand how effective their advertisement is**
- **Improve their marketing strategy**
- **Attract more visitors to their website**
- **Increase customer engagement**

Higher CTR usually means that the advertisement is useful, relevant, and interesting for users.

✓ **Simple Definition:**

CTR (Click-Through Rate) is the percentage of people who click on an advertisement or link after seeing it.

5) Why is Landing Page Quality important for PPC?

Ans) What is a Landing Page?

A landing page is the web page where a user arrives after clicking an online advertisement.

For example, if someone clicks your fitness advertisement, they should land on a page that shows fitness tips, workout guides, or health information.

Landing pages are very important in PPC (Pay-Per-Click) advertising, especially on platforms like Google Ads.

Why Landing Page Quality is Important

1. Improves User Experience

A good landing page helps visitors find the information they are looking for easily.

If the page is clear, simple, and useful, users will stay longer and explore the website.

If the page is confusing or slow, users may leave quickly.

2. Helps Improve Quality Score

In PPC advertising, platforms like Google Ads check the quality of your landing page.

If the landing page is:

- **Relevant to the advertisement**
- **Easy to read**
- **Fast loading**
- **Mobile friendly**

Then the ad gets a better Quality Score.

A higher Quality Score helps your ad rank higher in search results.

3. Reduces Advertising Cost

A good landing page can reduce the cost per click (CPC).

This means businesses can pay less money for advertisements while still getting good results.

4. Increases Conversions

A good landing page encourages visitors to take action, such as:

- **Signing up for a newsletter**
- **Buying a product**
- **Reading a blog post**

- **Contacting the business**

When more people complete these actions, the conversion rate increases.

5. Builds Trust with Users

When users land on a well-designed and informative page, they feel more confident about the website.

This helps build trust and credibility for the business.

Example

Suppose someone searches for “fitness tips for beginners.”

They click an advertisement for a website called Fitness Growth.

If the landing page shows:

- **Simple workout tips**
- **Healthy habits**
- **Beginner fitness guides**

Then the visitor will feel satisfied and stay on the page.

But if the page shows something unrelated, the user will quickly leave.

Simple Definition

Landing Page Quality is important in PPC because it improves user experience, increases ad performance, reduces advertising cost, and helps get better results from advertisements.

Section B

– Practical Tasks Task 1: Keyword Research Choose any business: Dentist / Laptop Store / Coaching Class / Café Find: • 10 Primary Keywords • 10 Long-Tail Keywords • Search Volume • CPC (approx.)

Ans) Task 1: Keyword Research for a Coaching Class

Step 1: What is Keyword Research?

Keyword research means finding the words or phrases that people type in search engines when they are looking for a service.

For example, if a student wants to join a coaching institute, they may search:

- “best coaching classes near me”
- “math coaching classes”

These words are called keywords.

Keyword research helps businesses appear in search results and attract students.

1. Primary Keywords (Short Keywords)

Primary keywords are short and general search terms.

They usually have higher search volume because many people search them.

Primary Keyword	Monthly Search Volume (Approx.)	CPC (Approx.)
coaching classes	90,000	₹20
coaching institute	60,000	₹18
best coaching classes	40,000	₹22
tuition classes	70,000	₹15
coaching center	35,000	₹17
online coaching classes	50,000	₹25
exam coaching institute	20,000	₹24

study coaching classes	15,000	₹16
competitive exam coaching	30,000	₹28
coaching for students	12,000	₹18

2. Long-Tail Keywords

Long-tail keywords are longer and more specific phrases.

They usually have lower search volume but better chances of getting students.

Long-Tail Keyword	Monthly Search Volume (Approx.)	CPC (Approx.)
best coaching classes near me	25,000	₹30
coaching classes for 10th students	18,000	₹22
affordable coaching institute near me	8,000	₹18
online coaching classes for exams	12,000	₹24
math coaching classes near me	15,000	₹20

science tuition classes near me	10,000	₹19
competitive exam coaching near me	14,000	₹27
best coaching institute for students	9,000	₹23
weekend coaching classes for students	5,000	₹16
coaching classes for board exam preparation	7,000	₹21

Meaning of Search Volume

Search volume means the number of times a keyword is searched in a search engine every month.

Example:

If the keyword “coaching classes” has a search volume of 90,000, it means about 90,000 people search for that keyword every month.

Higher search volume means more people are searching for that topic.

Meaning of CPC

CPC (Cost Per Click) means the amount advertisers pay when someone clicks their advertisement.

Example:

If CPC for “online coaching classes” is ₹25, it means the advertiser pays about ₹25 for every click on their ad.

Simple Summary

For a coaching class business, keyword research helps to:

- Find what students are searching for
- Improve website SEO
- Run better advertisements
- Attract more students

Primary keywords bring more traffic, while long-tail keywords bring more targeted students.

Task 2: Create Google Search Ad Prepare: ● 10 Headlines ● 4 Descriptions ● Final URL ● Path (Display URL) ● Extensions: ○ Sitelink ○ Callout ○ Call ○ Structured Snippet

Task 3: Campaign Structure • Campaign Objective • 2 Ad Groups • Keywords with Match Types • Negative Keywords (min. 5)

Ans) 1)

The screenshot shows the Google Ads Overview page. At the top, a red banner indicates the account is paused: "Account paused - To restart your ads, complete advertiser verification." Below this, the "Overview" section displays campaign metrics for the last 30 days (14 Mar - 12 Apr 2026). The metrics are as follows:

Clicks	Impressions	Avg. CPC	Cost
0	0	₹0.00	₹0.00

Below the metrics is a line chart showing performance over time. At the bottom, the "Account diagnostics" section states: "Account has issues and campaigns that needs attention".

2)

This screenshot shows the same Google Ads Overview page, but with the "All campaigns" filter menu open. The menu displays the following filters:

- Campaign status: Enabled, Paused
- Ad group status: Enabled, Paused
- Search: 5 campaigns
- z filters > campaigns
- Campaign #1 (Enabled) - 3 ad groups
 - Fitness Tips (Enabled)
 - Home Workout (Enabled)
 - Smart Fitness Routine (Enabled)
- Fitness Growth Search Ad (1 ad group)

The "Apply view" button is visible at the bottom of the filter menu. The background shows the same paused account status and campaign metrics as the first screenshot.

3)

The screenshot shows the Google Ads Overview page for a campaign named "Home Workout". The page is in a paused state, indicated by a red banner at the top: "Account paused - To restart your ads, complete advertiser verification." The left sidebar contains navigation options: Overview (selected), Recommendations, Insights and reports, Campaigns, Ad groups, Ads, Experiments, Assets, and Audiences, keywords and content. The main content area displays the "Overview" for the selected campaign. It shows a table with columns: Clicks (0), Impressions (0), Avg. CPC (₹0.00), and Cost (₹0.00). Below the table is a line chart showing performance over the last 30 days (14 Mar 2026 to 12 Apr 2026). The chart shows zero activity. The bottom of the page has a taskbar with various application icons and a system clock showing 13:31 on 13/04/2026.

4)

The screenshot shows the "Ad strength" and "Preview" section of the Google Ads interface. The top banner indicates the account is paused. Below this, the "Ad group" is "Home Workout" and the "Keywords" are "lose weight, exercise at home, home workout routine, weight loss exercise, walking for weight loss, weight loss coach, fitness food, fitness training at home, best way to lose weight fast, simple workout routine". The "Ad strength" section shows a "Try including more keywords in your headlines" tip and a "Preview" button. The "Preview" section shows a mobile device mockup displaying a Google search result for "weight loss exercise - Know More. Be Healthier" from the website "www.verywellfit.com/fitness/home-workout". The "Final URL" is "https://www.verywellfit.com" and the "Display path" is "www.verywellfit.com".

Section C – Display Ads Task (NEW) 🎨

Task 4: Create a Display Ad (Mandatory) Choose any business (Real Estate / Salon / Ecommerce / Fitness / Restaurant) and create:

1. Display Ad Size Create any 2 sizes from below:

- 300×250 (Medium Rectangle)
- 728×90 (Leaderboard)
- 300×600 (Half Page)
- 1080×1080 (Square Social Style)
- 320×100 (Large Mobile Banner)

2. Display Ad Content Write:

- **Headline** (30 characters)
- **Description** (90 characters)
- **CTA** (Shop Now / Book Now / Learn More)
- **Image idea**
- **Brand logo placement**
- **Colors to use**

3. Targeting Plan Choose any one targeting method:

- Audience Interest Targeting
- Custom Intent Audience
- Remarketing Audience
- Placement Targeting

Write:

- Who will see your display ad?
- Why did you choose this targeting

10) Campaign Name: Fitness Growth

i) Who will see your display ad?

Ans: People in Rajkot who are interested in fitness, gym workouts, weight loss, bodybuilding, and a healthy lifestyle. This includes students, office workers, and young adults who want to stay fit, exercise regularly, or join a gym to improve their health.

ii) Why did you choose this targeting?

Ans: I chose audience interest targeting to reach users who are already interested in fitness and healthy living. These people are more likely to click the ad, visit the gym, or join a fitness program, which increases engagement and makes the advertisement more relevant.

Section D

– Mini Project Choose any business and prepare a Complete PPC Strategy: • Campaign Goal • Budget Split (₹10,000 sample) • Keyword Table • Search Ad Copy • 1 Display Ad Concept • Landing Page Suggestions • Expected Results (CTR / CPC / Leads) • Optimization Strategy

Ans) PPC Strategy for Fitness Growth

1. Campaign Goal

The primary goal of this PPC campaign is to increase online visibility and attract people who are interested in fitness and gym training. The campaign will help promote Fitness Growth as a reliable place for people who want to improve their health, lose weight, or build strength.

By using Search Ads, the campaign will target users who are actively searching for gyms, fitness centers, or personal trainers. These users already have high intent to join a gym.

At the same time, Display Ads will help create awareness by showing visually attractive fitness advertisements on websites, apps, and YouTube. These ads will target people who are interested in fitness, exercise, and healthy living.

The main objective of this campaign is to increase gym memberships, generate leads, and bring more visitors to the Fitness Growth website or gym location.

2. Budget Split (₹10,000)

Splitting ₹10,000 between Search Ads and Display Ads

Campaign Type	Budget
Search Ads	₹6,000
Display Ads	₹4,000

Search Ads will target people with high purchase intent because these ads appear when users search for terms like “*gym near me*” or “*fitness center near me.*” This increases the chances that people will click the ad and join the gym.

Display Ads focus more on brand awareness. These ads appear on websites, mobile apps, and YouTube. They show visually attractive fitness images such as workout sessions, gym equipment, and trainers. Even if people are not searching for a gym, these ads can attract their attention and make them interested in fitness training.

Over time, this helps build brand recognition and attracts more potential customers.

3. Keyword Table

Keywords help the ads appear when people search for fitness services.

Keyword	Intent
gym near me	High
fitness center near me	High
best gym near me	High
personal trainer near me	High

weight loss gym	Medium
------------------------	---------------

gym membership near me	Medium
-------------------------------	---------------

fitness training near me	Medium
---------------------------------	---------------

affordable gym near me	Medium
-------------------------------	---------------

workout tips	Low
---------------------	------------

benefits of exercise	Low
-----------------------------	------------

home workout ideas	Low
---------------------------	------------

how to stay fit	Low
------------------------	------------

High-intent keywords bring people who are ready to join a gym, while medium and low intent keywords help attract people who are interested in fitness information.

4. Search Ad Copy

Search ad copy is the text that appears in Google Ads when users search for fitness-related keywords. It includes headlines and descriptions designed to attract users and encourage them to click the ad.

A good ad copy highlights benefits such as expert trainers, modern equipment, and flexible gym memberships.

Headlines

Start Your Fitness Journey Today

Join Fitness Growth Gym

Affordable Gym in Rajkot

Description

Join Fitness Growth today and achieve your fitness goals with expert trainers and modern equipment.

Transform your body with professional workout guidance and flexible membership plans.

When someone searches “gym near me”, the search results will show:

- **The headlines**
- **The descriptions**
- **The final website URL**

This helps users easily find the gym and learn more about the services.

5. 1 Display Ad Concept

The display ad concept focuses on motivating people to start their fitness journey.

The advertisement will show an image of people working out in a modern gym with trainers and equipment. This creates a feeling of energy, strength, and motivation.

The headline “Start Your Fitness Journey” clearly communicates the main message. The description highlights the benefits of joining Fitness Growth.

The background will use dark and energetic colors like black and red, which represent strength and power. The CTA button such as “Join Now” encourages users to take action and visit the gym.

Display ads help create interest even among people who were not actively searching for a gym.

6. Landing Page Suggestions

The landing page should be simple, attractive, and easy to navigate.

It should include:

- **High-quality images of the gym, trainers, and workout equipment**
- **Clear information about membership plans**
- **Details about personal training and weight loss programs**
- **Contact details and gym location**
- **A simple form where users can enter their name and phone number**

A strong Call-To-Action button like “Join Now” or “Book Free Trial” should be visible on the page.

The landing page should also include customer reviews and fitness success stories. This helps build trust and encourages people to join the gym.

Ads bring people to the website, but a good landing page helps convert them into customers.

7. Expected Results (CTR / CPC / Leads)

The expected results of the PPC campaign are based on average digital marketing performance.

**The Click Through Rate (CTR) is expected to be around 3% to 5%.
For example, if 100 people see the ad and 5 click on it, the CTR is 5%.**

The Cost Per Click (CPC) may range between ₹10 to ₹20, meaning the advertiser may pay around ₹10–₹20 for each click.

The campaign is expected to generate 100 to 200 website visits or potential leads per month. These users may contact the gym or visit the location to join membership programs.

Actual results may change depending on targeting, ad quality, and campaign optimization.

8. Optimization Strategy

Optimization means improving the campaign performance regularly.

First, keyword performance will be analyzed. Keywords that do not bring results will be removed, and new relevant keywords will be added.

Second, different headlines and descriptions will be tested through A/B testing to identify the best-performing ads.

Third, audience targeting will be improved to focus on people who are more interested in fitness and healthy lifestyles.

Fourth, the budget will be adjusted by spending more money on high-performing ads and reducing budget on ads that do not perform well.

Continuous monitoring and improvement will help increase CTR, reduce CPC, and generate more leads for Fitness Growth.
