

1) What are the main factors that can affect PPC bidding?

Ans) In PPC (Pay-Per-Click) advertising, **bidding means how much money you are ready to pay when someone clicks your ad**. Platforms like **Google Ads** decide which ads appear based on different factors — not only money.

Here are the main factors that affect PPC bidding 📌

★ 1 Keyword Competition

If many businesses want the same keyword, the bid price becomes higher.

Example:

“Digital Marketing Course” → High competition → Higher bid.

Less competition keywords usually cost less.

★ 2 Quality Score

Quality Score means how good and useful your ad is.

It depends on:

- Relevant keywords.
- Good ad text.
- Useful landing page.

Better quality score = lower cost and better ad position.

★ 3 Ad Relevance

Your ad should match what people are searching.

Example:

If someone searches “fitness training,” your ad should talk about fitness training.

Relevant ads get better results at lower bids.

★ 4 Click Through Rate (CTR)

CTR means how many people click your ad after seeing it.

If more people click your ad:

- 👍 Platform thinks your ad is helpful.
 - 👍 Your ad rank improves.
-

★ 5 Target Audience & Location

Bidding cost changes depending on:

- City or country.
- Age group.
- Audience interest.

Example:

Big cities usually have higher bidding costs.

★ 6 Device Type

Cost can change based on:

- Mobile users.
- Desktop users.
- Tablet users.

Sometimes mobile clicks are cheaper or more expensive depending on industry.

★ 7 Time and Day (Ad Scheduling)

Bids can increase during busy hours.

Example:

Business ads during office hours may cost more.

★ 8 Competitor Activity

If many competitors increase their bids, your bidding cost may also increase.

✓ Conclusion

PPC bidding depends on keyword competition, ad quality, audience targeting, CTR, timing, and competitors. A good quality ad can sometimes rank higher even with a lower bid.

2) How does a search engine calculate actual CPC?

Ans) **Actual CPC (Cost Per Click)** means the **real amount you pay when someone clicks your ad**.

In PPC advertising platforms like **Google Ads**, you do not always pay your full bid amount.

Search engines use a formula based on **Ad Rank and Quality Score** to decide the final cost.

★ Meaning

👉 You pay **just enough money to stay above the competitor below you**, not your maximum bid.

★ Actual CPC Formula

Actual CPC = (Ad Rank of competitor below you ÷ Your Quality Score) + ₹0.01

★ Example

Suppose:

Your Maximum Bid = ₹50

Your Quality Score = 10

Competitor below you Ad Rank = 80

Then:

Actual CPC = $(80 \div 10) + ₹0.01$

Actual CPC = ₹8.01

👉 Even though you were ready to pay ₹50, you only pay about ₹8.

★ Factors That Affect Actual CPC

- Quality Score (better quality = lower cost).
- Competitor bids.
- Ad relevance.
- Click Through Rate (CTR).
- Landing page quality.

★ Why Search Engines Do This?

Search engines want:

- Helpful ads for users.
- Better user experience.

So good ads can pay less and still rank higher.

✓ Conclusion

Actual CPC is not your maximum bid. Search engines calculate it using competitor rank and quality score, so better ads can get cheaper clicks. 👍

3) What is a quality score and why it is important for Ads?

Ans) **Quality Score** is a rating given to your advertisement by platforms like **Google Ads**.

It shows **how useful and relevant your ad, keywords, and landing page are for users**.

Quality Score usually ranges from **1 to 10**.

★ What Decides Quality Score?

- 1 **Keyword Relevance** — Your keywords should match the user's search.
 - 2 **Click Through Rate (CTR)** — More clicks mean people like your ad.
 - 3 **Landing Page Quality** — Page should load fast and give correct information.
-

★ Why is Quality Score Important?

- ✓ Helps your ad rank higher.
 - ✓ Reduces cost per click (you pay less money).
 - ✓ Brings more visitors to your website.
 - ✓ Improves ad performance and user experience.
-

✓ Conclusion

Quality Score tells how good your ad is. A higher score helps you get better ad position and cheaper clicks. 👍

4) Create an ad for your website/ blog in Google Ads that display on the display network with the properly targeted audience
