

SEO Assessment Section A – Basics (Short Answers)

1. What is SEO? Explain On-Page and Off-Page SEO.

Ans) **SEO (Search Engine Optimization)** is the process of **improving a website so it appears higher in search engine results** like Google Search.

When people search for information online, search engines show many websites. SEO helps a website **rank higher on the results page**, so more people can find and visit the website.

The main goal of SEO is to **increase website traffic, improve visibility, and attract the right audience**.

On-Page SEO

On-Page SEO means **optimizing the content and elements inside a website** to help search engines understand the page better.

It includes improving things like **titles, headings, keywords, images, and content**.

Examples of On-Page SEO include:

- Writing **high-quality content**
- Using **proper keywords**
- Adding **meta title and meta description**
- Using **headings (H1, H2, H3)**
- Optimizing **images with alt text**
- Adding **internal links**

On-Page SEO helps search engines understand **what the webpage is about**.

Off-Page SEO

Off-Page SEO means **activities done outside the website to improve its ranking and reputation.**

It helps search engines understand that the website is **trusted and popular.**

Examples of Off-Page SEO include:

- **Getting backlinks** from other websites
- **Social media sharing**
- **Guest blogging**
- **Business directory listings**
- **Online promotions**

Off-Page SEO helps increase **website authority and trust**, which improves ranking in search engines.

2. Define keywords. What is the difference between short-tail & long-tail keywords?

Ans) **What are Keywords?**

Keywords are the **words or phrases that people type in a search engine** like Google Search when they want to find information.

In SEO, keywords help search engines **understand what a webpage or article is about.** When the right keywords are used in website content, it becomes easier for search engines to show that page to users.

For example:

If someone searches “**fitness tips for beginners**”, the words in that search are called **keywords.**

Difference Between Short-Tail and Long-Tail Keywords

1. Short-Tail Keywords

Short-tail keywords are **very short search phrases**, usually **one or two words.**

They are **broad and general**, so many websites try to rank for them.

Examples:

- Fitness
- Marketing
- Skincare
- Shoes

Features:

- Very high search volume
 - Very high competition
 - Not very specific
-

2. Long-Tail Keywords

Long-tail keywords are **longer and more specific phrases**, usually **three or more words**.

They target a **specific topic or search**.

Examples:

- Best fitness tips for beginners
- Digital marketing course for students
- Natural skincare for oily skin

Features:

- Lower search volume
 - Lower competition
 - More specific and targeted
-

Simple Summary

- **Keywords** → Words people search on search engines.
- **Short-tail keywords** → Short, general, and high competition.
- **Long-tail keywords** → Longer, specific, and easier to rank in SEO.

3. What is Crawling, Indexing & Ranking?
4. What is a SERP? Mention any 3 SERP features.
5. What is domain authority
